Experience - Project Manager & Design Architect

Delano Architects • Nigeria

- Design Architect and Project Manager
- Date: 2012 - 2020

RESPONSIBILITIES:

- Value engineering: Carried out Value Engineering that helped contain the budget assigned for a multi-level building structure by shedding approximately 2 meters from the total height of the building without losing its functionality.
- Design & Presentations: Convinced a client to preserve an existing structure while designing a residential structure which then attracted more investors to the project because they wanted to be associated with the historic monument that now serves as a landmark for the project.
- Coordination: organized the consulting team by creating a sense of team work at every stage of project development.
- Tender analysis of bids: was able to work with other consultants on a project in selecting and negotiating a budget friendly contract for both the Client and Contractor, thereby saving the client more than 15% of the initial total cost for construction.

PROECS MANAGED:

Worked on the following projects from, briefing, space planning, conceptual design through construction drawings and contract administration and project management.
